Allgaier-Group

About us

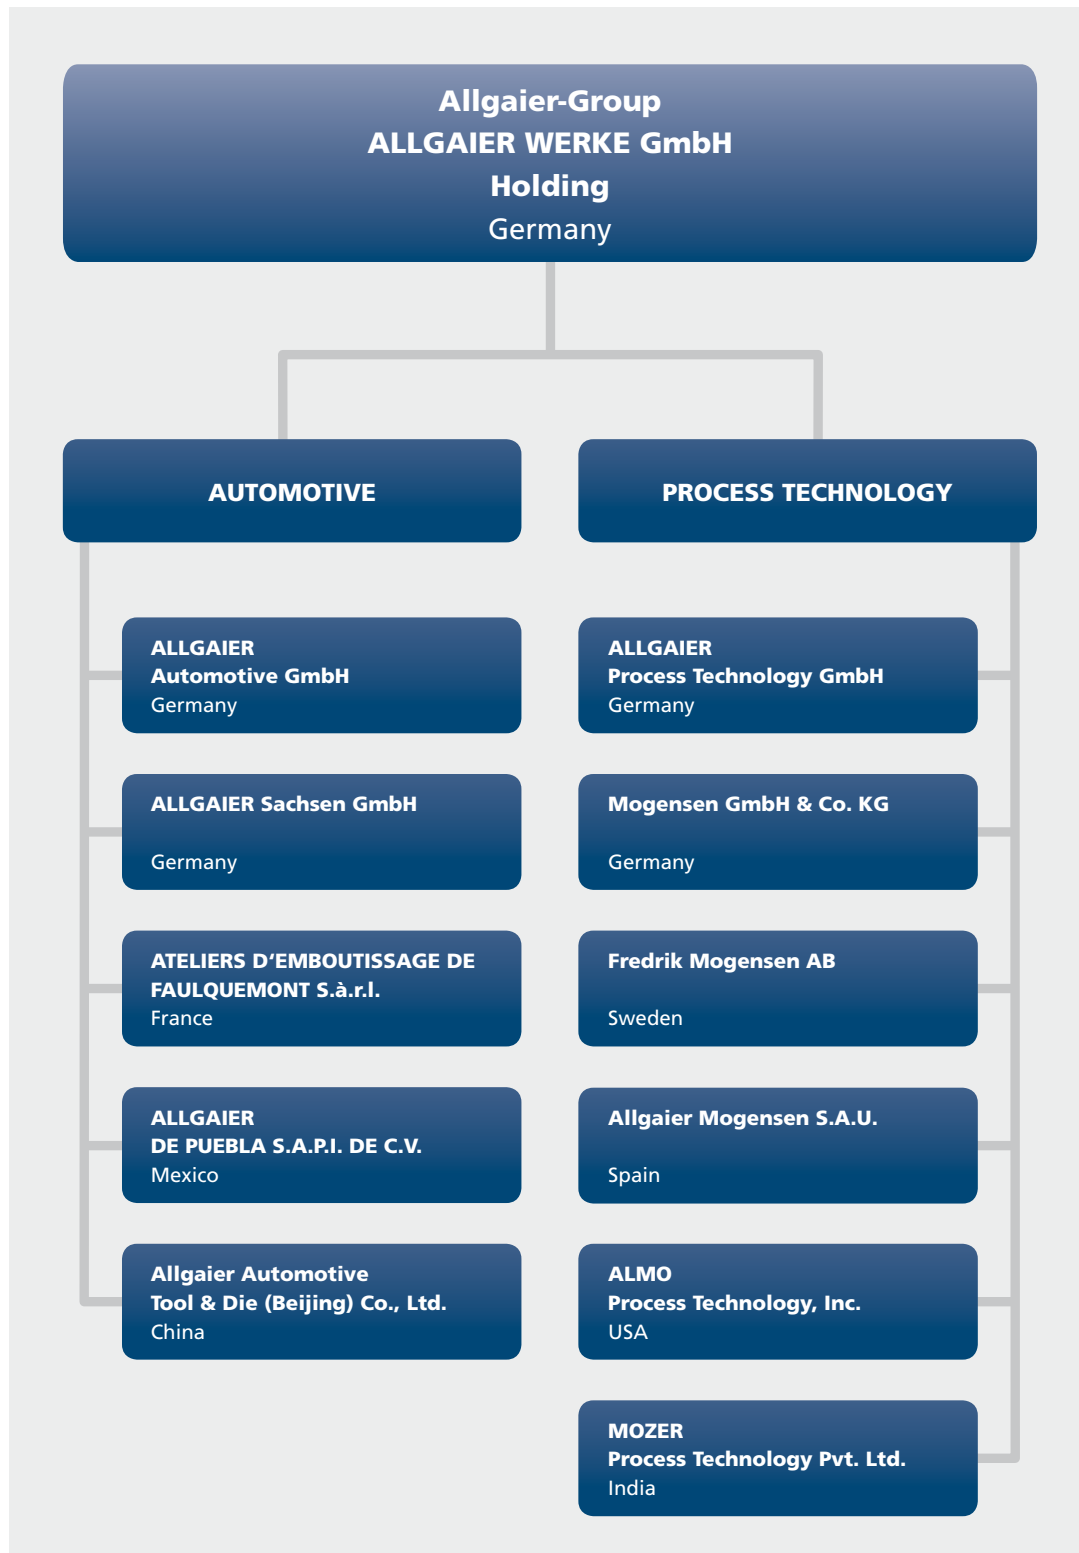

Allgaier-Group

The Allgaier Werke GmbH, founded 1906 by Georg Allgaier in Uhingen, operates in two different industries serving customers worldwide. The automotive field develops and manufactures tools, pressed parts, components and fuel systems. In the process technology field, a wide range of systems for washing, drying, cooling, screening and sorting are offered for the bulk goods processing industry.

The company is successfully represented in all major industrialized countries of the world due to the acquisition and foundation of numerous subsidiaries, both in Germany and abroad.

Corporate structure

The business divisions

Automotive

The Allgaier Automotive division is a system provider for the automotive industry.

We offer the complete range of products from development and manufacture of tooling, production of parts, assembly of sophisticated vehicle body parts and tank systems.

Process Technology

The mechanical and plant engineering for the process technology is the second pillar of the Allgaier-Group. We manufacture and ship systems for washing, drying, cooling, screening and sorting for the worldwide bulk goods processing industry.
